Optional upgrade XP SP2 to XP SP3.  This may be required in order to connect tablets to Windows XP.  Run update while disconnected from Internet:

http://www.microsoft.com/en-us/download/details.aspx?id=24

Optional upgrade Windows Media Player 9 to Windows Media Player 11.  Some MP3 players need this!  Run update while disconnected from Internet.  For Win XP:

First disconnect Internet then upgrade java to version 1.7.0.4.  Be careful, this will disable LimeWire and other programs that use Java 1.6.  LimeWire is junk anyway.  Some programs, online games and e-learning websites may need updated Java.  Otherwise don't bother updating from Java 1.6.  Please note this is NOT the most up to date version of Java:

First disconnect Internet then upgrade Firefox to version 11, March 2012; this is NOT the latest version:
